## TICKETING

Create event pages with your own branding and custom ticket types. You can even set up deposit schemes purchase options. Festival Pro can generate QR coded eTickets and automatically deliver them as PDF's via email. Real time statistics and reports are available to view and export in CSV spreadsheets.

Any type of event no matter how big or small, from food festivals to music and beer we can cater for your ticketing needs.

## Event Set-Up

### Custom Page Design

The ticketing pages can be made to look like your website.

### Timeslots

Create timed entry tickets and limits on number sold.

### Tiered Tickets

Set up start and end dates or maximum available for tiered pricing for tickets.

### Different Ticketing Options

Any ticketing options you may need from multiple selects and comments, quantities to single options.

### Low Transaction Fees

We charge a small competitive rate for each ticket sold.

### Deposit Tickets

Allow customers to pay for tickets in instalments. They can log-in and pay however much they want.

## Advanced Customer Search

There are multiple ways to find a booking or group of bookings. From number of tickets bought to phone number. You can set up marketing campaigns and target specific customers or send out a bulk email to everyone who has entered their email address.

### Run Multiple Events

On one system you can run different ticketed events. Even make each one look completely unlike the other.

### Real time Statistics/ Reports

At any time you can view the figures of tickets bought, amount taken, event progress and other data you may need.

### Automatic Money Transfers

All the money from customers goes straight to you, so no waiting around until after the festival for your cash.

### Ambassador Scheme

Run an ambassador scheme from your system where ambassadors can earn rewards for selling tickets.

### Discount Codes

The ticketing pages can be made to look like your website.

### Resell Tickets

If a customer can no longer attend the event they can use Festival Pro to sell on their tickets officially.

### Spotify & Facebook

The ticketing pages can be made to look like your website.

### Payment Gateways

Festival Pro is connected to multiple payment gateways: Paypal or Stripe.

### Data Exportable CSV

All data in the system can be exported in spreadsheets. From artists info to ticket buyers.

# FESTIVALPRO

## TICKET SCANNING

Festival Pro can also take care of scanning at your festival or event. Once the tickets have been generated - the code is automatically in the system and can be scanned by the Festival Pro app.

There is no need for connection to the internet as a mini server can be installed on-site and the scanners will connect to the database.

The scanners will receive feedback via the app once the ticket has been scanned of the ticket type, validity, and if it has been scanned before.

If no WiFi is available - the tickets are scanned on the local device and the scans synchronises when WiFi is available.

Use the app for:

- Real time statistics
- Local/remote scanning available
- A live record of visitors
- Guest lists and accreditation scanning
- Scan meal tickets

You can download the Android or iPhone app to scan tickets created by Festival Pro.
